### **COMPREHENSION**

México is a large Central American country, between the Atlantic and the Pacific Oceans. It is a mountainous land, but there are also beaches, like the ones in Acapulco. There are jungles and deserts, like the Sonora Desert. The weather is tropical in the Gulf of Mexico and hot and dry in the Pacific coast. Mexico City is an interesting city because there are many cultures. It is also the capital of the country and it's an industrial city. The Aztec is an example of an agricultural Mexican civilization of the past. Teotihuacán is an archaeological zone with large and important pyramids.

The Maya is also an ancient culture in the Yucatan peninsula, and a good example of an advanced civilization, principally in science, mathematics and astronomy.
